Bug 001

Title: Pagination allows navigation to non-existent pages in Overall Rating section

Description: When using pagination to navigate to the next page in the Overall Rating section of the web application, users are able to navigate beyond all existing pages. This means that users are able to navigate to non-existent pages, which can lead to confusion and errors.

Steps to Reproduce:

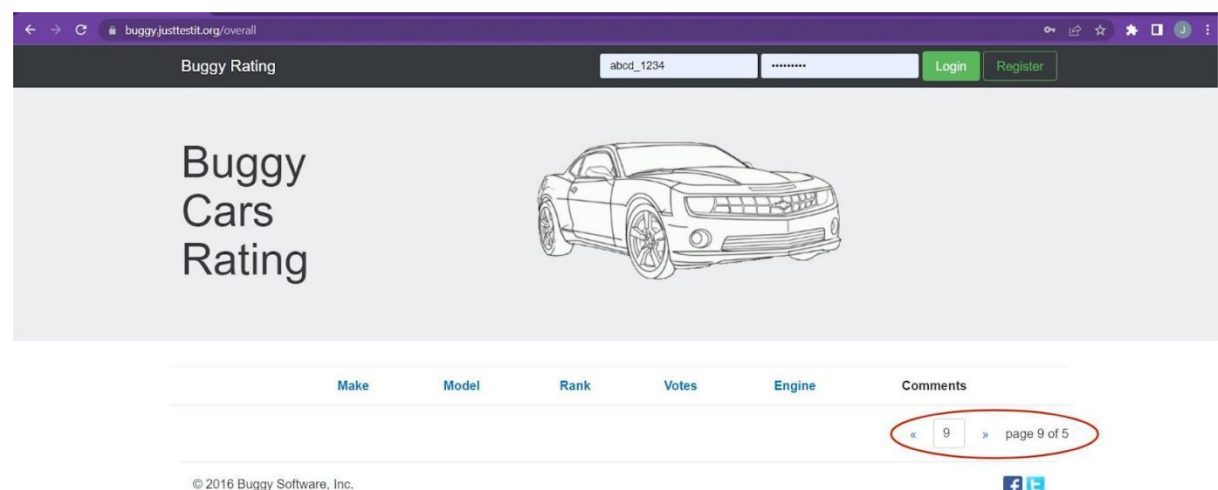

1. Open the web application.
2. Navigate to the Overall Rating section.
3. Scroll down to the bottom of the page and click on the "Next Page →" button
4. Verify that the user is able to navigate beyond all existing pages.

Expected Result: Users should only be able to navigate to existing pages and should not be able to navigate to pages that do not exist.

Actual Result: Users are able to navigate beyond all existing pages.

Additional information: The issue was observed on the latest version of Chrome running on Windows 10.

A video demonstrating this issue has been attached.- **Bug001.mp4**

Bug002 :

Title: Pagination input field not working for last page in Overall Rating section

Description: The pagination input field in the Overall Rating section of the web application is malfunctioning when attempting to navigate to the last page (page 5). Upon entering the number 5 and pressing enter, the last page fails to load. This issue is not observed when using the input field to navigate to other pages.

Steps to Reproduce:

1. Open the web application
2. Navigate to the Overall Rating section.
3. Enter the number 5 in the pagination input field.
4. Press enter.
5. Verify that the last page is not loaded.

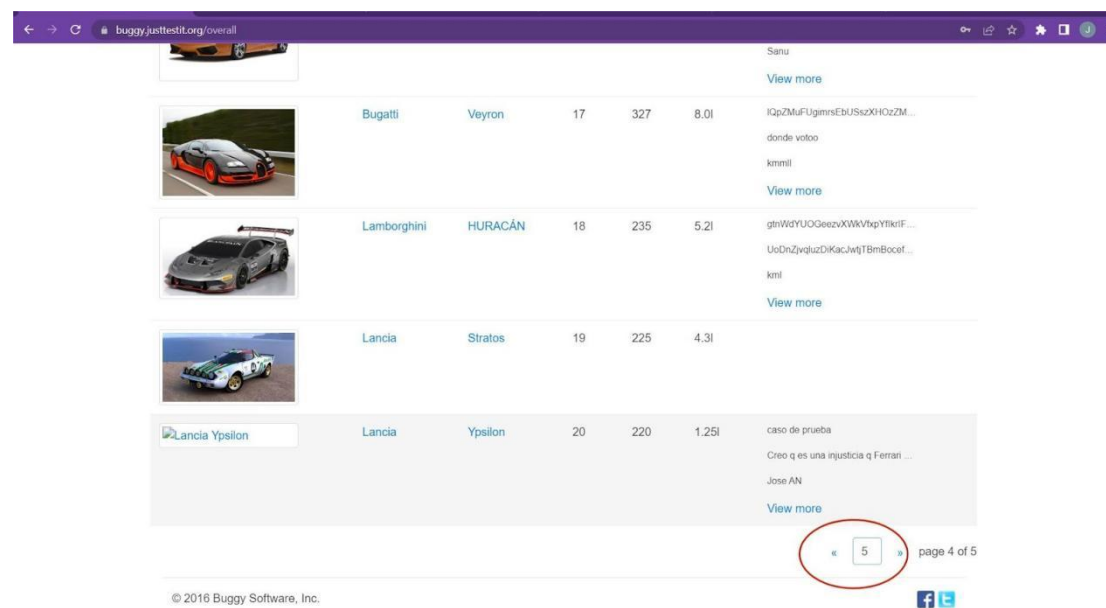

Expected Result: The user should be able to navigate to the last page by entering the last page number in the input field.

Actual Result: The user cannot navigate to the last page when entering the last page number in the input field.although works for navigating to other pages.

Additional information: The issue is observed consistently and only affects the navigation to the last page using the input field. This issue needs to be resolved to ensure users can access the last page through the input field.

Additional information: The issue was observed on the latest version of Chrome running on Windows 10.

A video demonstrating this issue has been attached.- **Bug002.mp4**

Bug 003

Title: The back button on the Overall Rating page of the browser is not working as expected.

Description:

When using the back button on the Overall Rating page of the browser, it redirects users to the homepage instead of the previous page they were on. This issue creates inconvenience for users who need to navigate back to the previous page they visited.

Steps to Reproduce:

1. Navigate from the homepage to the Overall Rating page.
2. Navigate from the Overall Rating page to another page, such as page 2 or page 3.
3. Press the browser's back button to go back to the previous page.

Expected Result:

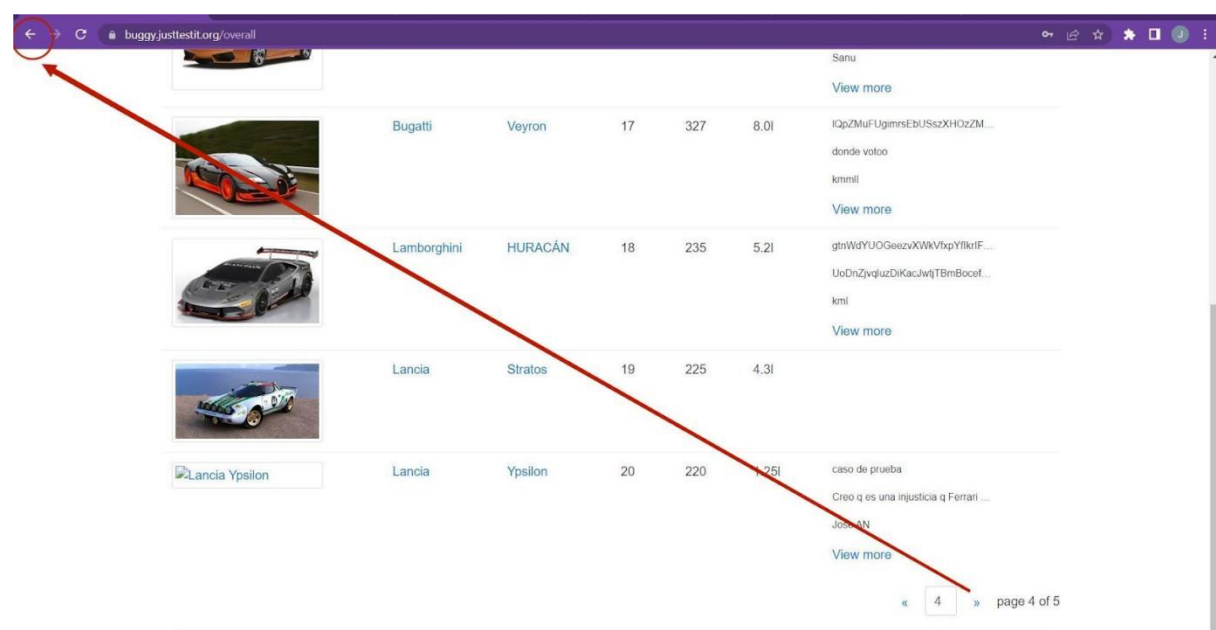

The browser should take the user back to the previous page they were on, such as page 2 if they previously navigated from page 2 to page 3.

Actual Result:

The browser redirects the user to the homepage instead of the previous page they were on.

Additional information: The issue was observed on the latest version of Chrome running on Windows 10.

A video demonstrating this issue has been attached.- Bug003.mp4

Bug 004 :

Title: Logout Button on Overall Rating Pages Not Functioning

Description:

The Logout button located within the Overall Rating pages is not performing as expected. When the user is on the Overall Rating pages, clicking on the Logout button should log them out.

Expected Result:

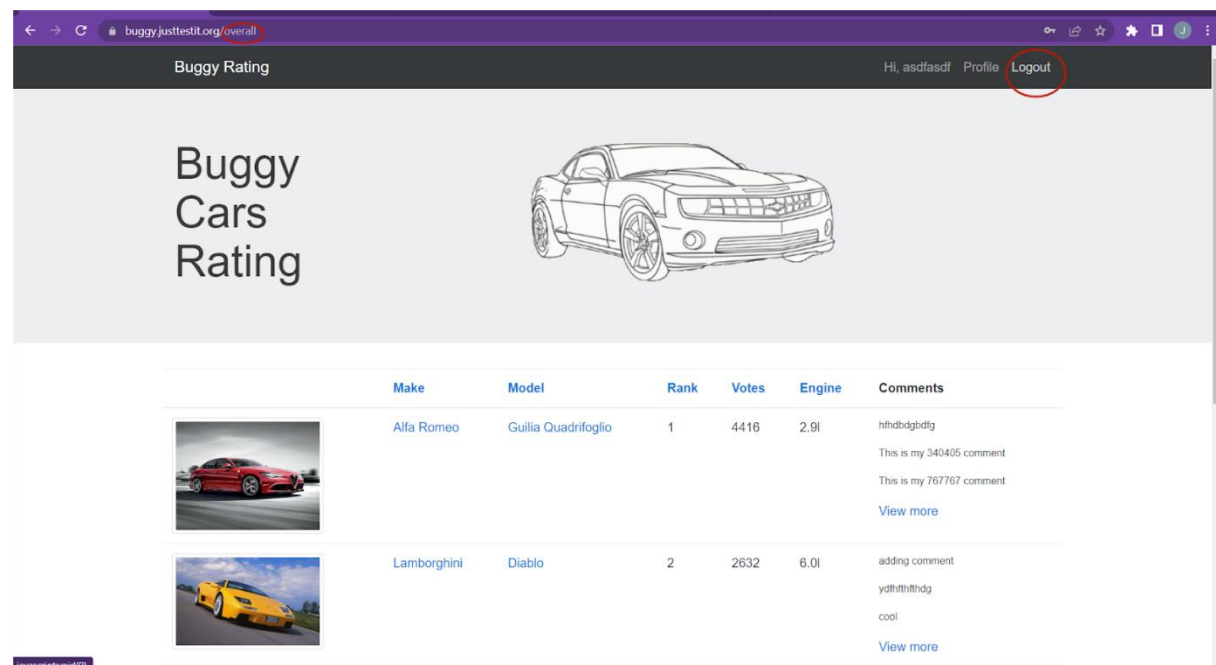

Clicking on the Logout button while on the Overall Rating pages should log out the user from the system.

Actual Result:

Clicking on the Logout button located inside the Overall Rating pages does not log out the user. It does nothing, which is unexpected behaviour and prevents users from properly logging out.

Steps to Reproduce:

1. Navigate to the Overall Rating pages while logged in.
2. Click on the Logout button.
3. Observe that the user remains logged in, and the Logout button does not perform its expected function.

Bug005

Title: Issue with Viewing Lancia Vote Details from Overall Rating Section on Page 4

Description:

Users are unable to view the Lancia vote details and picture when clicking on the Lancia car image on Page 4 of the Overall Rating section. Instead, a blank screen is displayed, and the login and buggy rating buttons do not function. Furthermore, clicking the browser back button while on the blank screen results in the user getting stuck on the same page.

Steps to Reproduce:

1. Open the web application and navigate to the Overall Rating pages.
2. Go to page 4 of the Overall Rating section.
3. Click on the Lancia car image.

Expected Result:

Clicking on the Lancia car image should display the car's picture and vote details. Users should be able to navigate back to the previous page using the browser back button.

Actual Result:

Clicking on the Lancia car image results in a blank screen with no pictures, preventing users from viewing the vote details. The login and buggy rating buttons do not function, and clicking the browser back button while on the blank screen results in the user getting stuck.
